Surveying, Mapping & Photogrammetry

Our drones are capable of carrying out complex surveying tasks to deliver millimetre accurate results. By utilising drones on site for surveys, we can reduce the amount of staff required on site which can lead to a safer working.

Using high resolution imagery, we can deliver pin sharp results that can be relied on. We use ground control points to accurately measure and blind check our results before delivery.

Photogrammetry & Groundworks

Guaranteed <50mm accuracy across 10,000+ measurable points. Accurately measure Cut & Fill from thousands of measurable points, with a 72 hour turnaround

Hectares	Total Project Cost
1-4	£1400
5-8	£1800
9-12	£2050
13-16	£2250
17-20	£2450

Mapping

Create a super high resolution map of an area by combining thousands of images to generate a detailed output that can be viewed and shared to the workforce or used to accurately measure the distance between points

Hectares	Total Project Cost
1-4	£300
5-8	£450
9-12	£600
13-16	£800
17-20	£1000

Road & Highway Surveying

Document the progress of roadworks or a closure and provide updates to crews and surveyors without having to visit site.

These surveys can provide crucial information and avoid unnecessary site visits, saving time and keeping workforce out of danger.

Total KM	Price Per KM
1-25	£100
26-50	£90
51-75	£85
76-100	£80
101+	£75

CLOUDVISUAL

Unmanned Aviation Services

Civil Aviation Authority certified to commercially operate drones, with an unrivalled safety record and a commitment to client satisfaction.

Public liability insurance of £10m, all crew CSCS qualified and a dedicated focus to safety.
